BARGARD™ protective covers are approved for use as impalement protection (for rebar or similar protruding objects) at grade or above grade when used in accordance with the Installation Instructions. Please contact the manufacturer or distributor if the Installation Instructions are missing or illegible. Failure to properly install protective covers will significantly decrease any impalement protection that may otherwise be provided and may result in serious injury or death. Inspect for damage prior to use; do not use damaged or defective protective covers. Discard protective cover if positioning fins are missing or damaged. Protective covers are not approved for use for fall distances greater than 7 feet 6 inches, or as protection for weights above 250 pounds.
