## SuperFlex™ Stainless

Made specifically for the dry-wall pro, these rust-resistant stainless steel blades combine a Rockwell hardness that resists dulling and wear with much greater flexibility than other stainless steel tools on the market. A thinner hollow grind profile and flex point give these the flexible feel that many pros prefer for mudding and taping walls. Overmold comfort grip and Hammer Head® end for resetting popped nails and screws.

**Hammer Head® End** for resetting popped nails and screws

**Overmold Comfort Grip**

**Stainless Steel Blade** with a thinner, hollow grind profile, is 25% more flexible than other stainless steel

# Did someone say dust-free?

**Do it the HYDE® way.**

Before there were HYDE® Dust-free Sanders, every sanding job turned into two jobs — sanding your project, then cleaning invasive dust off of every surface.

All that changes when you attach a HYDE® Dust-free Sander to your wet-dry vacuum. These sanders eliminate 95% of the dust, so you get professional sanding results without the cleanup, and without risking your health by choking down all that dust.

# SANDING TOOLS

## Remove up to 99% of drywall dust with HYDE® Dust-free Sanders

### New for Professionals: Durable, lightweight pole sander

This pro pole sander is both lightweight and longlasting, and uses top-of-the-line abrasive sanding nets specially designed for dustfree-sanding. Attach to your wet-dry vac to remove up to 99% of drywall dust.

- 2-piece pole extends from 28" to 56" as you work
- Aluminum and stainless steel construct for durability
- Rubberized sanding pad holds tight to the wall
- Fast, effective sanding with no "flipping"
- EasyClamp™ system for easy sheet loading
- Patented abrasive nets last 3x longer than sandscreens
- Universal adapter

### Dust-free drywall hand and pole sanders

Remove dust using hatched sandscreens that are washable, reusable, and longerlasting than sandpaper.

- Remove 95% of dust
- Universal adapter fits standard wet/dry vacs
- EasyClamp™ system for easy sheet loading

### Dust-free sponge sander for any surface

This sander, which uses a sanding sponge, is effective for sanding drywall, stucco, wood or metal. A channel around the sponge allows the vacuum to remove 95% of dust.

Includes two medium-grit sponges, including one for use in corners without damaging the abutting surface. A key benefit: sponges last 3 times longer than sandpaper and are washable, reusable and replaceable. Patent pending.

Part #09160

## HYDE® Pivot Nozzle Wands

Adding a Pivot Nozzle Wand to your pressure washer allows you to step back, stay dry and reach into every nook and cranny without pain and strain. With a twist of the handle the patented nozzle pivots up to 90° as you work, so you can reach in, over, under or around obstacles and still keep a 90° angle to the surface for maximum power. With the Pivot Nozzle Wand, the tool does all the work, making pressure washing more productive and much less tiring. Models are available for use with all major brands of gas and electric pressure washers. U.S. Patent #6979644. Other U.S. and International Patents Pending.

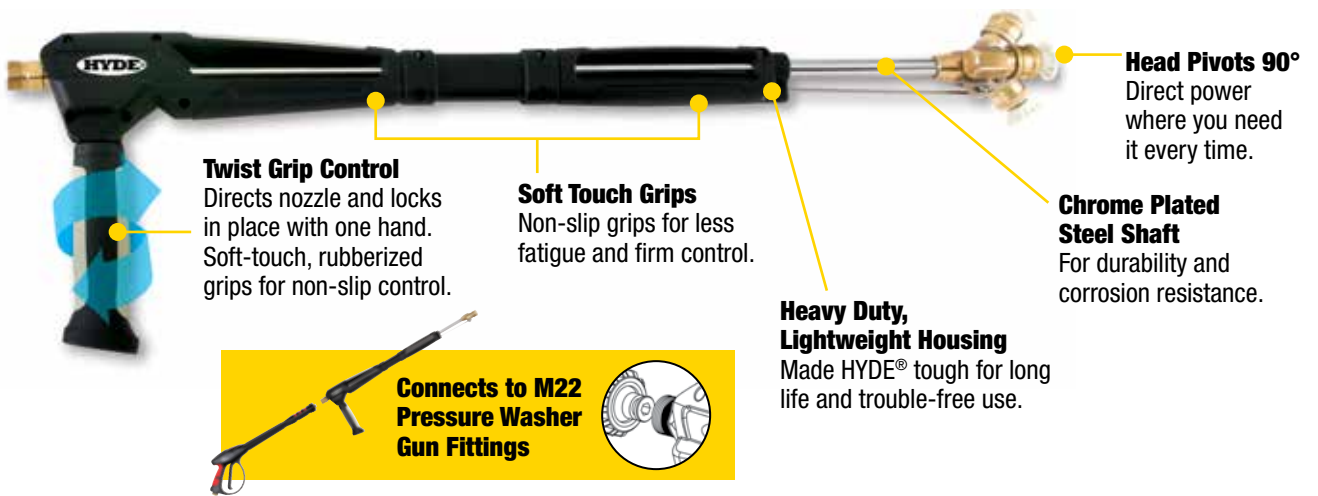

### 28430 28" Chrome-Plated Wand for Gas Pressure Washers (M22-style)

# AIRLESS SPRAY TOOLS

## The RVT Airless Spray System

The HYDE® RVT Airless Spray System is so fast and easy, one painter can do the work of a full crew. This game-changing system combines a high-quality airless spray gun with a lightweight, telescoping pole — but here's the real deal: to move from spraying with a gun to using an extension, you simply switch the valve from gun to pole and continue on.

No powering down, and the switch takes only seconds, so you'll paint the full length and breadth of a wall in the time it takes others to set up scaffolding!

**28700 HYDE® Airless Spray System with RVT Technology**  
Full kit includes an airless spray gun with an RVT valve, tip, tip guard and inline filter, and a 5-1/2' to 8-1/2' spray pole. Gun is fully assembled and ready to spray. U.S. Patents #6378922, #5485960 and patents pending.  
*\*Clam pack, 6.6lb, 1pk*

**28710 RVT Spray Gun**  
Includes gun, RVT valve, tip, tip guard and inline filter.  
*\*Clam pack, 4.4lb, 2pk*

**28715 RVT Replacement Valve**  
For use with RVT System (item #28700) or Spray Gun (item #28710).  
*\*Clam pack, 2.lb, 5pk*

**28720 RVT Replacement Spray Mount**  
Replacement Spray Mount for RVT spray system. Also fits all RVT-compatible QuickReach® spray poles (items #28670, #28680, #28690).  
*\*Clam pack, 3.8lb, 4pk*

**28735 RVT Replacement Inline Filter Housing**  
Inline filter housing for use with the HYDE® RVT System (item #28700) or Spray Gun (item #28710).  
*\*Clam pack, 0.8lb, 5pk*

**28740 RVT Replacement Filter**  
Replacement filter for HYDE® RVT System (item #28700) or Valve (item #28715).  
*\*Clam pack, 0.3lb, 5pk*

28

## The HYDE® RVT system is a better way to spray.

Paint every job faster with less fatigue.

Finally, an airless spray system that lets you spray nonstop, switching easily from gun to spray pole as you paint. Unlike most poles, the RVT telescopes ... extending your reach up to 8-1/2 feet — or 12 feet when used with a QuickReach® pole.

No more ladders or scaffolding. No powering down or depressurizing. And no need to carry a heavy gun at the top of the pole. Just pop the lightweight valve off the gun, mount it to the pole and keep on spraying. No paint runs through the pole, so even cleanup is easy!

*“The HYDE® RVT saves us time and an unbelievable amount of money.”*

Jay Bowen, Eastern Painting and Refinishing  
Hyde Park, VT

## QuickReach® Telescoping Poles

QuickReach® telescoping poles extend out to their maximum height in seconds, offering the professional painter freedom of reach and coverage. Lengths vary to accommodate indoor, one-story applications or large jobs requiring paint heights up to 16'. Can be used with all major brands of spray gun. Can also be used with the HYDE® RVT System (Item #28700). U.S. Patents #6378922, #5485960.

**28670**  
**4.5'-6.5' QuickReach® Telescoping Spray Pole**  
Extends from 4.5' to 6.5' for use in applications with ceilings or paint heights up to 10'. Perfect for one-story exterior and indoor painting.

*\*Boxed, 4.0lb, 1pk*

**28680**  
**5.5'-8.5' QuickReach® Telescoping Spray Pole**  
Extends from 5.5' to 8.5', offering the professional painter freedom of reach and coverage for a wide range of jobs. Small enough for indoor use or painting in tight spaces, but long enough when extended to reach 16' ceilings.

*\*Boxed, 4.7lb, 1pk*

**28690**  
**7.5'-12' QuickReach® Telescoping Spray Pole**  
Extends from 7.5' to 12', giving the professional maximum extension for painting exteriors, cathedral ceilings or areas normally reached on a ladder.

*\*Boxed, 5.7lb, 1pk*

**28730**  
**QuickReach® Replacement Mount (RVT Compatible)**  
Quick-connect replacement mount for RVT-compatible QuickReach® poles (items #28670, #28680, #28690) or with RVT System (item #28700).

*\*Boxed, 4.6lb, 4pk*

## AnglePRO® Spray Poles

The AnglePRO® airless spray pole has a patented lever that lets you change the spray angle up to 145° without stopping to manually adjust. Quickly paint soffits, closets, ductwork or any other job that requires reaching into tight areas. U.S. Patent #6976644.

**28260**  
**3' AnglePRO® Spray Pole**  
Spray nonstop while adjusting your angle for maximum coverage of complex angles or open framework. 3' pole, pressure rated to 4000 PSI for most paint and coating applications.

*\*Boxed, 2.0lb, 1pk*

**28270**  
**5' AnglePRO® Spray Pole**  
5' pole, pressure rated to 4000 PSI for most paint and coating applications.

*\*Boxed, 3.0lb, 1pk*

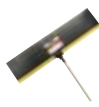

## PROShield® Spray Shields

These shields, designed for the paint and drywall trades, shield surfaces when spraying paint or texture. Especially useful with extension poles. The shields have a PivotNeck system that adjusts to any angle, plus a runoff lip and rustproof blades. Furnished with 18" Acme-threaded hardwood handles. U.S. Patent #4962722.

# WALL REPAIR TOOLS

## Wet & Set® Wall Repair Patch

- Amazingly Fast & Easy
- Sets in 15 Minutes
- Repair & Repaint Same Day

### Wet & Set® Wall and Ceiling Repair

There simply is no faster, more professional way to repair a hole or crack in drywall, plaster, stucco or even wood than with this fabric patch that hardens into a permanent patch within minutes. Cut it to size with scissors. Then, just dip it in water and spread it over the damaged area. Stains, holes, cracks and crumbling damage disappear within seconds, replaced by a hard, permanent patch that's ready for a finish coat within 20-30 minutes. Perfect for flat, curved or uneven surfaces. WET & SET® forms a strong polymer adhesion that won't peel or delaminate like some patching materials do. In most cases, one coat of patching compound is all it takes — no two-day wait to finish up the job. Available in single flat sheets or economical 3-yard contractor rolls.

Caulk Aid**

This multi-purpose caulking tool lets you refresh old caulk with a single tool and a minimum of effort. On one end are sharp, high-impact plastic blades designed to shave old caulk clean from tile or window mullions. A sharp point (hidden in the middle) removes any remaining caulk from crevices. Once the surface is clean, the padded end of the tool will smooth a new caulk bead to a neat, consistent profile. Also helpful: A caulk tube cutter on the back of the tool slices open the replacement caulk tube.
